

ROSY BLUE
MORE THAN DIAMONDS

Dear Sir, Madam,

Subject: Provenance disclosure request

Rosy Blue has a history of responsible conduct. We need to make sure that every diamond that enters Rosy Blue premises, is responsibly sourced and manufactured, as well as being of guaranteed natural origin. Therefore we are looking to have a better understanding of the origin of the polished diamonds that we purchase.

As a basic principle, we would like you to disclose any information you may have on diamonds' journey until today.

Therefore please could we ask that you provide on your invoice to us with the following information?

1. Provenance of the polished diamond: country of origin and/or mining company where the rough is coming.
2. Declaration that the goods are guaranteed to be ethically sourced, ethically manufactured

Misleading or deceptive claims or statements about the source and other product attributes pose a significant risk to the reputation of both you and us, as well as the industry as a whole. It may raise, as a minimum, legal compliance issues under laws that prohibit false and deceptive advertising or reporting.

We thank you for your understanding,

Yours sincerely,

Mr. Raj Mehta
Director Rosy Blue NV
